Klapptest – Bruch Gemischt 3

Falte das Blatt entlang der Linie und schreibe das Ergebnis anschließend in die Kästchen. Schreibe weitere Nebenrechnungen auf ein Karoblatt.

1) $\frac{2}{7} \cdot \frac{11}{12} + \frac{1}{49} = \frac{\square}{\square} \cdot \frac{\square}{\square} + \frac{\square}{\square} = \frac{\square}{\square}$ $= \frac{83}{294}$

2) $\frac{15}{16} + \frac{13}{8} \cdot \frac{1}{6} = \frac{\square}{\square} + \frac{\square}{\square} \cdot \frac{\square}{\square} = \frac{\square}{\square}$ $= \frac{29}{24}$

3) $\frac{1}{3} + \frac{1}{2} \cdot \frac{10}{7} = \frac{\square}{\square} + \frac{\square}{\square} \cdot \frac{\square}{\square} = \frac{\square}{\square}$ $= \frac{22}{21}$

4) $\frac{8}{35} + \frac{14}{15} \cdot \frac{2}{3} = \frac{\square}{\square} + \frac{\square}{\square} \cdot \frac{\square}{\square} = \frac{\square}{\square}$ $= \frac{268}{315}$

5) $\frac{5}{17} + \frac{3}{11} \cdot \frac{1}{4} = \frac{\square}{\square} + \frac{\square}{\square} \cdot \frac{\square}{\square} = \frac{\square}{\square}$ $= \frac{271}{748}$

6) $\frac{15}{4} \cdot \frac{7}{8} + \frac{11}{28} = \frac{\square}{\square} \cdot \frac{\square}{\square} + \frac{\square}{\square} = \frac{\square}{\square}$ $= \frac{823}{224}$

7) $\frac{71}{3} + \frac{3}{4} \cdot \frac{4}{5} = \frac{\square}{\square} + \frac{\square}{\square} \cdot \frac{\square}{\square} = \frac{\square}{\square}$ $= \frac{14}{15}$

8) $\frac{2}{15} \cdot \frac{11}{3} + \frac{8}{45} = \frac{\square}{\square} \cdot \frac{\square}{\square} + \frac{\square}{\square} = \frac{\square}{\square}$ $= \frac{2}{3}$

9) $\frac{1}{10} + \frac{7}{25} \cdot \frac{7}{5} = \frac{\square}{\square} + \frac{\square}{\square} \cdot \frac{\square}{\square} = \frac{\square}{\square}$ $= \frac{123}{250}$

10) $\frac{3}{25} \cdot \frac{3}{8} + \frac{1}{6} = \frac{\square}{\square} \cdot \frac{\square}{\square} + \frac{\square}{\square} = \frac{\square}{\square}$ $= \frac{127}{600}$
