

Klapptest – Assoziativgesetz 2

Falte das Blatt entlang der Linie, vertausche, setze Klammern und berechne anschließend das Ergebnis.

1) $31 + 35 + 29 + 42 + 58$

$$\begin{aligned} &= \underline{\hspace{2cm}} \\ &= \underline{\hspace{2cm}} = \underline{\hspace{2cm}} \end{aligned}$$

$$\begin{aligned} &(31 + 29) + 35 + (42 + 58) \\ &= 60 + 35 + 100 = 195 \end{aligned}$$

2) $125 + 111 + 50 + 35 + 49$

$$\begin{aligned} &= \underline{\hspace{2cm}} \\ &= \underline{\hspace{2cm}} = \underline{\hspace{2cm}} \end{aligned}$$

$$\begin{aligned} &(125 + 35) + (111 + 49) + 50 \\ &= 160 + 160 + 50 = 370 \end{aligned}$$

3) $396 + 407 + 414 + 593 + 19$

$$\begin{aligned} &= \underline{\hspace{2cm}} \\ &= \underline{\hspace{2cm}} = \underline{\hspace{2cm}} \end{aligned}$$

$$\begin{aligned} &(396 + 414) + (407 + 593) + 19 \\ &= 810 + 1000 + 19 = 1829 \end{aligned}$$

4) $217 + 370 + 123 + 50 + 67$

$$\begin{aligned} &= \underline{\hspace{2cm}} \\ &= \underline{\hspace{2cm}} = \underline{\hspace{2cm}} \end{aligned}$$

$$\begin{aligned} &(217 + 123) + (370 + 50) + 67 \\ &= 340 + 420 + 67 = 827 \end{aligned}$$

5) $176 + 56 + 234 + 224 + 716$

$$\begin{aligned} &= \underline{\hspace{2cm}} \\ &= \underline{\hspace{2cm}} = \underline{\hspace{2cm}} \end{aligned}$$

$$\begin{aligned} &(176 + 224) + (56 + 234) + 716 \\ &= 400 + 280 + 716 = 1396 \end{aligned}$$

Ergebnis:

15 P.
