

Prozentrechnung I - Mixed

Berechne die fehlende Größe, wenn G der Grundwert, p% der Prozentsatz und P der Prozentwert ist.

1) $G = 3,43 \text{ €}$ $P = 90,49 \text{ €}$ $p\% = \underline{\hspace{2cm}}$

2) $G = 984,21 \text{ m}^3$ $p = 0,6\%$ $W = \underline{\hspace{2cm}}$

3) $P = 58,67 \text{ €}$ $p = 1,0\%$ $W = \underline{\hspace{2cm}}$

4) $G = 56,89 \text{ km}$ $p = 0,6\%$ $W = \underline{\hspace{2cm}}$

5) $G = 917,08 \text{ m}^3$ $p = 0,6\%$ $W = \underline{\hspace{2cm}}$

6) $G = 35,24 \text{ m}^3$ $P = 6,83 \text{ m}^3$ $p\% = \underline{\hspace{2cm}}$

7) $P = 77,68 \text{ m}^3$ $p = 0,5\%$ $W = \underline{\hspace{2cm}}$

8) $P = 99,32 \text{ €}$ $p = 1,0\%$ $W = \underline{\hspace{2cm}}$

9) $G = 802,29 \text{ €}$ $p = 1,4\%$ $W = \underline{\hspace{2cm}}$

10) $G = 48,75 \text{ m}^2$ $p = 0,9\%$ $W = \underline{\hspace{2cm}}$
